

Gentile Professor De Angelis

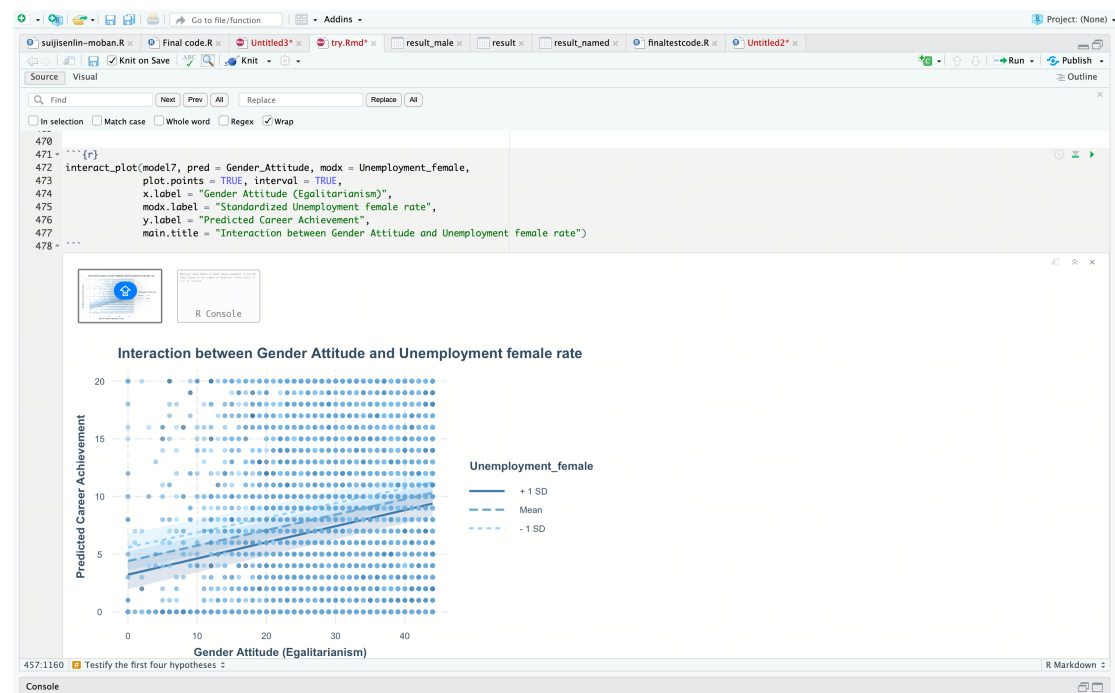

Buongiorno!

Mi scusi per non poter consegnare un rmd. Ho provato a scrivere un rmd file e ho finito tutto. Ma alla fine, quando volevo knit the file in html, si è caricato per lungo e poi non è successo. Non so perché, ma non posso risolvere questo problema come mostrato nelle screenshot allegate. Spero che il code sia abbastanza chiaro per capire.

Grazie mille e buone vacanze!

Cordiali saluti

Wen Yu

The screenshot shows the RStudio interface with the R console open. The console output displays the progress of the knitting process, including file processing, URL attempts, and package updates.
